Create, send, delete and manage keys remotely and even track who enters your property. With unique keys for each user, you'll always know who opens your door and at what time.

FEATURES

Create, send, delete and manage keys remotely

Create unique keys for each visitor

Voice Guide: Spoken feedback to guide users

Ideal for residential use, short term rental properties, holiday homes, hotel apartments

Grant keys based on the guests' stay duration and revoke keys automatically at the end of the rental period

No need to rush around the town at odd hours to hand over or collect keys from guests.

Send keys as needed – one time keys, permanent keys, periodic access keys as suited for guests, admin, cleaning staff etc.

Digital touch screen keypad

Send keys via SMS, email, Whatsapp, messenger or eKeys – the guest doesn't need to download the app (except for ekeys)

Very convenient and easy to use for both guest and owner

Real time unlocking records in mobile app

Secure latch system

Get audit trail/user records of lock/unlock (card/ passcode, app) records on App
