

# COMMERCIAL AND RESIDENTIAL SOLUTIONS

# SOLUTIONS & SERVICES

Infinite Technologies specializes in control automation and AV design and installation. We bring you the newest in cutting-edge technology for smart building automation and control and provide high-end audio visual equipment. We can connect any Apple® iPad®, iPhone® or other smart devices to a personalized control portal for your choice, commercial space, venue or luxury transport. This device can become a media display controller, light switch, a thermostat, a media player, and an on/off, open/close, and up/down button for just about anything in your commercial environment — from anywhere in the world.

## Smart Building Automation & Control

Today's complex environments require a new, higher level of integration and automation of services. Welcome to the next level of intelligent spaces in which the citizen of the 21st Century can work, learn and play. Welcome to the world of Infinite Technologies. Using control and automation systems that are scalable, configurable and efficient, users can enjoy an unprecedented level of interaction with climate, security, energy-management, lighting, advanced telephony and media display systems in an Infinite Technologies-designed intelligent space. Infinite Technologies offers an Apple-based platform that is easy to install and maintain. Experience building automation that is comprehensive, reliable, instantly familiar and easy to use.

## Whole House Audio

Throughout your home, by the pool, or in individual rooms, hear what you want to hear, or watch the program of your choice. Your own media server can store, access and distribute your selection of iTunes-based music or video to any room in your home. As many as five independent streams of media can be selectively distributed to various locations in your home simultaneously. Synchronize your iOS device to your home's media library and your favorite song can be played anywhere. Connect a guest's iPhone to a media dock and his or her media library can be enjoyed throughout your home.

## Lighting Control System

Your tablet or phone shows you every light in every working space or living space. Tap the image of the room, watch it fill the screen, then touch the light that you want to switch on, switch off, brighten or dim. The image of the light on your phone or tablet will show you how the actual light obeys your touch on the screen, brightening or dimming accordingly. Command your lighting to interact with motion sensors to dim lights when an area is unoccupied. Create 'scenes' for different times of day or for specific space user requirements; lowering selected lights for daytime and turning them on for the evening hours.

## Security & Networking

Our CCTV systems are installed using the latest equipment from the world's top manufacturers, using cameras with high resolution, high frame rate, night vision, and NVRs with storage ability customized to your needs. All our systems have network connectivity, making them accessible from any PC or phone on the network, with optional remote access available. These systems can be integrated with other home automation solutions, allowing easy access and custom UIs.

## Acoustic Treatment/Sound Proofing

Soundproofing is used to lower the transmission of sound between rooms, while acoustic proofing improves the sound quality within a room where audio is expected to be played or recorded. Both are achieved by the intelligent placement of internal and external wall panels and insulation material. As Infinite Technologies also installs AV systems, we can design and position your audio equipment and acoustic paneling to work perfectly with each other without compromising the function of the room.

## Climate Control System

Take total control of your building's climate; from room to room, from time of day to time of year. Set comfortable temperatures throughout each working space or living space, scheduling high quality air-conditioning to cool when required, closing blinds and opening shades as part of a customized energy management system. Create daily schedules and monthly calendars of climate control, for each defined space.

# SOLUTIONS & SERVICES

Infinite Technologies specializes in control automation and AV design and installation. We bring you the newest in cutting-edge technology for total home automation and control and provide high-end audio visual equipment, music and television installation, and home theater systems. We can connect your Apple® iPad®, iPhone®, or other smart device to a personalized control portal for your entire home. This device can become a TV remote, light switch, a thermostat, a personal media player, and an on/off, open/close, and up/down button for just about anything in your home — from anywhere in the world.

## Home Cinema

Place your iPad in the dock, and let the show begin. Crystal-clear 4K video and heart-pounding Dolby ATMOS sound is immediately under your control. You can stream and enjoy online entertainment from YouTube or other online content provider. With your iPad, you can close the curtains, dim the lights, set room temperature and cue up tonight's movie. Then, without missing a second, you can monitor your security cameras or check other online information feeds such as weather or sports news.

## Safety & Security

Ensure that the people you love and the things you own are safe and secure. Press one button to activate motion sensors and security cameras that monitor all movement, turn on revealing night lights, close all blinds and lock all of your doors. Configure your security system to illuminate the path to your front door and allow you inside - as you reach home. Monitor your residence remotely on the screen of your iOS device, viewing the image from each and every security camera. Receive emails or text messages every time somebody enters or leaves your home, when your children return from school, whenever a medicine cupboard is opened. Set individual profiles configuring your children's access to your home automation systems. Rest easy in protected comfort.

## Video Walls & Digital Signage

For the ultimate in stunning video impact, versatility, reliability and clarity, rely on Infinite Technologies to you the last word in display excellence. Sophisticated image processing lets you broadcast a single image across multiple screens or configure several different video feeds together on a single video wall. Commercial-grade LCD panels, supported by edge-lit LED technology enable management of temperature and energy consumption for a 24/7 video wall experience. Highest quality rear-projection solutions are also available. Be it the ultimate home video display or mission critical digital signage that must always maintain flawless performance, your solution is here.

## Digital Art

Architectural video walls are a stunning reinvention of the video display. From art for arts sake to breathtaking expressions of brand identity, Planar Mosaic displays allow 3 different video tile shapes and sizes - including a 1:1 square video tile - to be mounted in any position and at any angle relative to each other, enabling you to create your own unique video display.

## Wired & Wireless Conference System

Thriving communities are built on the ability to talk and listen across divides. In governments, institutions, businesses, or courts worldwide, progress often depends on constructive debate that leads to effective decisions. Televic Conference is committed to empowering decision-making through moderated meetings: live or hybrid, regardless of venue or size. Our ambition: to make sure that everyone can hear and be heard. Understand, and be understood. Televic deliver the world's most advanced conference solutions. Solutions that harness the power to drastically enhance the intelligibility, moderation, and simultaneous interpretation of any meeting, anywhere, anytime.

# INDUSTRIES & APPLICATIONS

Infinite Technologies designs and installs advanced hardware and software solutions for a wide range of commercial industries. Our reliable, scalable and intuitive automation and control systems allow for global operability while increasing energy efficiency for almost any commercial environment. Whether it be building automation for corporate offices, digital signage for retail environments or entertainment media systems for luxury transportation, we have a solution for your commercial needs.

## Corporate Enterprise & Executive Boardrooms

The corporate environment requires a calm, efficient and smooth communication experience that supports your concentration and clarity. Lighting, shading, climate and security features are all at your command via your iOS device. Compelling presentations and impactful briefing are all made easy by responsive audio-visual and multimedia technology seamlessly integrated into your boardroom or conference centre. Video conferencing and cutting-edge telepresence can be configured, installed and powered by Infinite Technologies. Enjoy the benefits of a supportive, productive working environment, with total control at your fingertips.

## Yachts & Luxury Transportation

Let Infinite Technologies take the show on the road, to the air and on water. One touch from your iPad activates intelligent lighting and raises the curtain on your home theatre as you cruise on your yacht. Control light, shade, temperature, sound and video on your luxury touring vehicle. For those of you who fly privately, the ultimate in environmental and entertainment control could be at your fingertips; a bespoke experience made possible by Infinite Technologies.

## Education Presentation Systems

Infinite Technologies offers the state of the art in educational presentation and support systems. Multimedia is just the beginning, with interactive whiteboards and lecture capture systems supported by full audio and video capability, intelligent lighting, shading and temperature control. As with any other venue, safety and a range of utilities can also be placed under your control. Learning has never been quite so impactful or memorable.

## Arenas & Large Venues

Infinite Technologies offers you the ultimate interactive experience. Imagine an event with the latest in video walls, audio PA systems, minutely controllable event lighting rigs, massive automated display platforms and an array of content delivery options. Your show will be unforgettable, your presentations impactful and your conferences and exhibitions will hit headlines. Control it all through iOS devices, dedicated smart remote controls and on-TV menus.

## Hotels & Hospitality

Hotels and other hospitality venues are transformed by intelligent technology into spaces that are exquisitely responsive to the needs of guests and patrons. Infinite Technologies can configure and integrate systems that meet the distinct needs of each distinct space within a venue. Suites and VIP accommodation can offer state of the art entertainment. Guests can dock their own iOS device and play their own media into high-end A/V systems. From one location, manage energy, run system diagnostics, schedule maintenance and security systems. Integrate lighting with motion and occupancy sensors. Monitor all spaces with a comprehensive network of security cameras. Restaurant climate can be managed from minute to minute. In bars and nightclubs, each node of digital signage and distributed A/V can be controlled from your command centre.

## Retail & Restaurants

From a single retail outlet to an entire mall, Infinite Technologies offers a scalable, responsive automated experience. Elegant storefront or restaurant lighting, intimate climate control, pleasant mall music, and compelling digital displays and signage can be scheduled by time of day, month or year, configured to respond to customer movement and controlled by dedicated touch screens or by iOS devices.

# BRANDS & PRODUCTS

Infinite Technologies works with only the most respected brands and products in the industry. These are the brands and products we recommend when designing and installing your home automation or home theater system. Although we highly recommend these brands, we are happy to discuss other brands and products that might meet your functionality requirements. Our goal is to meet your requirements and exceed your expectations with only the highest quality products.

uniCOS T/MM10 is Televic's flagship multimedia conferencing solution specifically designed for the Plixus architecture that can be configured for either chairpersons or delegates. With HQ audio, up to 6 lip-synched video streams, document sharing and more, all audible and visual information are at the participants' fingertips thanks to the tiltable 10" touchscreen. The units are very easy to install with a single CAT 5e cable, and power is delivered over the Plixus network.

The Plixus Nameplate saves time, money and manual labor by replacing paper nameplates thanks to the E Ink technology for optimal legibility and minimal eye strain. It allows for crisp text with high contrast and a maximum viewing angle (180°). E Ink also guarantees minimal power consumption, and the information on the display can be retained if the nameplate is powered off. Finally, the Plixus Nameplate display eliminates reflection and flicker, even when filmed or broadcast.

Crestron Electronics has carved the path for technological innovation since 1972. We create automation solutions that transform the way people live their lives, making their day-to-day tasks easier and improving efficiency and productivity. We strive to be at the forefront of cutting-edge technology, constantly offering faster, better solutions that address the needs of customers the world over. With Crestron, you aren't just buying top-of-the-line electronics, you are investing in scalable and customized solutions, gaining 24/7 global service and support, and sponsoring products that are designed and manufactured in America.

Control4 is a provider of automation and networking systems for homes and businesses, offering a personalized and unified smart home system to automate and control connected devices including lighting, audio, video, climate control, intercom, and security.
